

TECH AS A SERVICE

Cost considerations
& Finance options

TECH AS “TaaS” A SERVICE

Organisations of all sizes are shifting towards a services-based, pay-as-you-go model for their IT consumption. It's time to consider technology-as-a-service.

With Tech-as-a-Service you can:

- Make it simple, quick, and easy to acquire hardware, software, and support services through a subscription.
- Refresh and upgrade your solutions more frequently with a simplified, single contract.
- Add further levels of security , communications, services and support through ACS's all encompassing offering..

Get in contact to discover more about Tech-as-a-Service, why you should work with us, and how we can help.

BENEFITS OF TECHNOLOGY

as

a

SERVICE

Drive Growth

Use TaaS to procure more powerful effective solutions.

Refresh your kit and ensure up to date hardware, software and services.

Protect & Maintain

Attach accessories to every order, protect your hardware.

Maintain multiple services and maintenance at an affordable cost.

Reduce Cost

Using TaaS moves away from large capital investments converting CapEX to OpEX.

Quick and easy ordering.

TECH RE- NEW

Tech Renew is a bespoke device trade in programme; it takes the complexity out of trading in devices, delivering a better experience. The average price of a used mobile increased from £30 in 2007 to £85 in 2018, some models retaining 70 percent of their value nine months after launch.

Tech Renew handles the entire process, from real-time quoting for a single or multiple devices – to order tracking, secure shipping and guaranteed data erasure. You can search and obtain a quotation for multiple devices simultaneously.

Benefits

1. Maximise your IT budget
2. Environmental Accreditation
3. Certified Data Erasure so you can trade-in with complete confidence
4. Products included in the programme are multi vendor tablets, phones and Apple laptops

The devices will be inspected and validated by our team which will then be shared with you for approval.

EXAMPLES
