BUILD

We will do the hard work for you so the project is stress free.

DELIVER

We will deliver on our promises so you can enjoy a seamless experience.

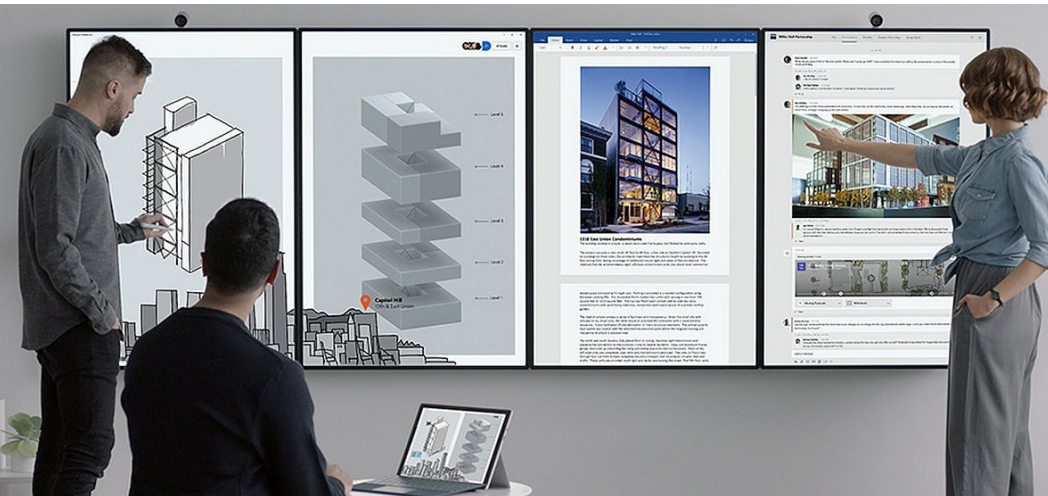

SUPPORT

We have a support team committed to giving you peace of mind.

Agile environments for the changing face of business practice.

Advancement in technology, workforce behaviour, the need for security and the evolution of communication are all fundamental and ever changing. We believe that the ability to be integrated and flexible is what will make our customer's workforce and relationships thrive.

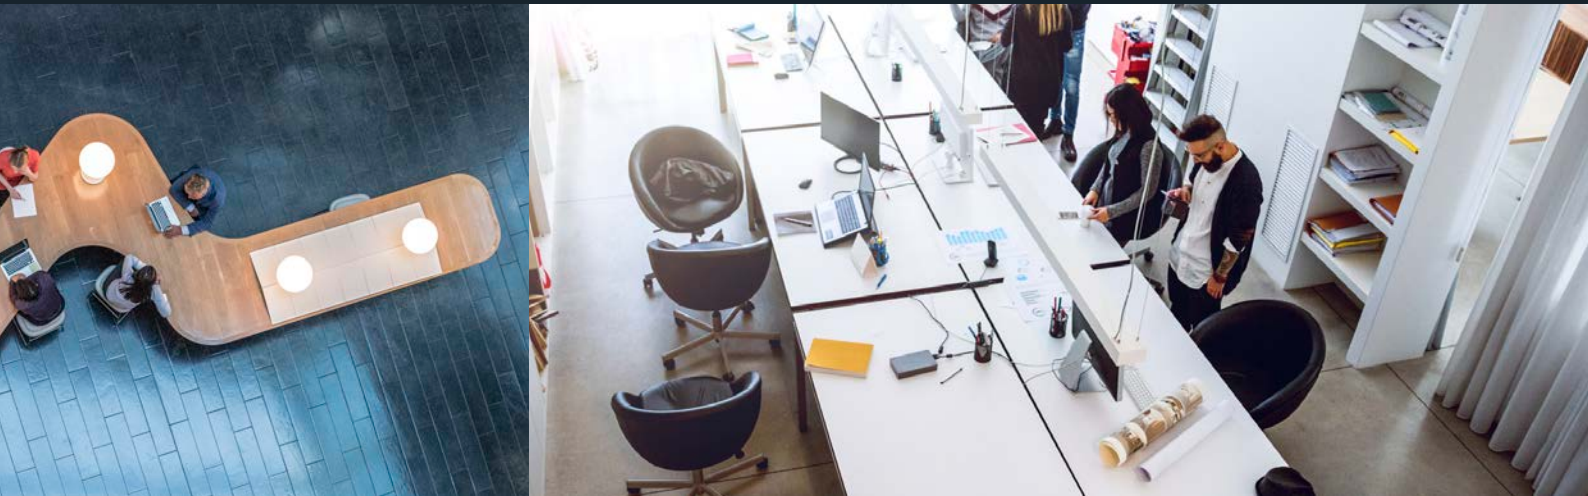

Creative solutions that are an extension of your business brand.

The brand personality and workplace behaviour of every customer is different. ACS celebrates what makes our customers unique. We want everyone to feel engaged with their environment and believe a workplace should evoke emotion and challenge the status quo.

Vision for the future of industry.

As a successful business with a long legacy we believe in having your eyes on the future by placing emphasis on attracting the next generation of talent, staying ahead of competitors and adopting good business practices with social responsibility to ensure continued stability.

Focused and ready to respond in winning ways.

All businesses should feel calm and assured of their choices. We understand that engaging ACS for workplace projects is a big deal for you. Our team is always on hand to help. Your needs are our focus and your budget can be honoured.

WE ARE WORKPLACE

SECURITY

Your workplace Security should always be proactive not just reactive. We offer a comprehensive portfolio of sophisticated, resilient solutions. As new security risks arise we review the threat landscape and what it takes for businesses to tackle it. Our experienced and accredited security team can help you to protect your business against today and tomorrow's ever-evolving threats.

Vulnerability auditing

ACS's vulnerability auditing services cover all aspects of your network including operating systems, network devices and firewalls. Our certified team can conduct a comprehensive review of your security infrastructure to identify any pitfalls and share a clear path to improve.

Cyber Essentials

Cyber Essentials PLUS is a premiere compliance certification laid out by the UK government. Display your business commitment to security by demonstrating the appropriate measures are in place. As an IASME Licensed Certification Body we offer fixed fee packages of consultancy, audit and certification. Large contracts increasingly require Cyber Essentials before procuring services.

Did you know?

Cyber crime is now the world's second most common economic crime, according to PWC.

GDPR consultancy

GDPR outlines principles you must comply with when processing personal data. You must process personal data lawfully, fairly and in a transparent manner in relation to the data subject. Our team can consult on all your GDPR requirements.

Penetration testing

Penetration testing attempts to breach some or all of your system's security using the same tools and techniques as an adversary might. We give your online security a realistic work-out allowing you to harden your defences against intrusion.

Endpoint security

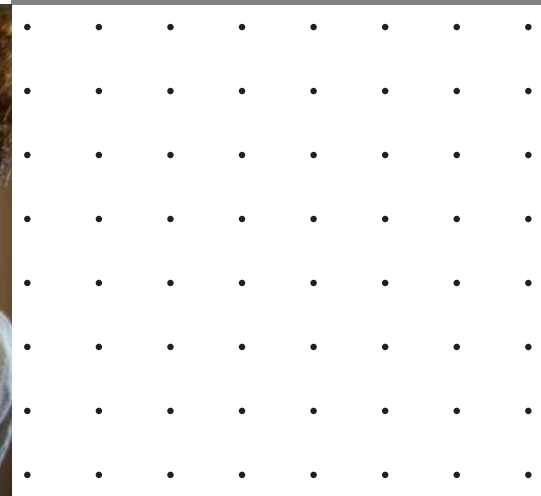

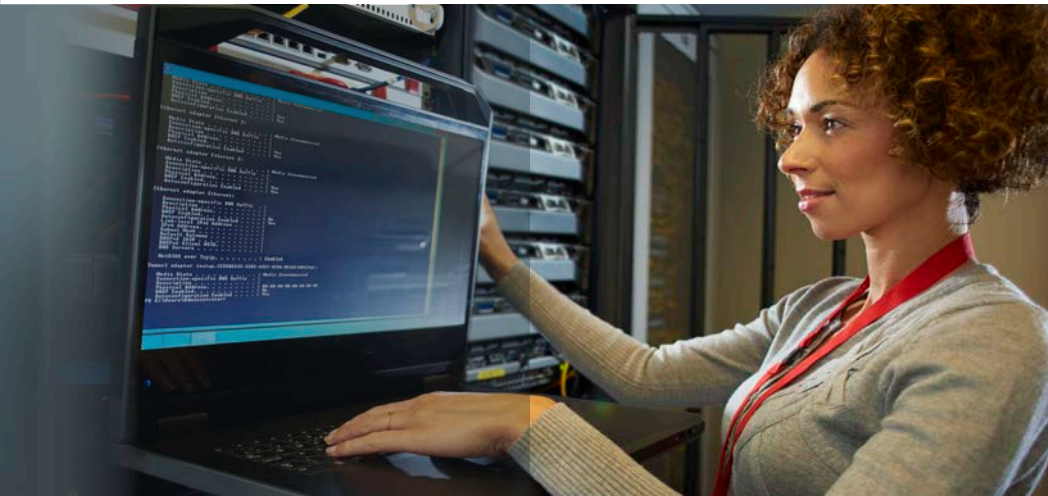

We use solutions from leading vendors including Webroot, Cisco & Microsoft to secure Endpoint devices for compliance that protects your network and data.

Multifactor authentication

We deploy a diverse range of authentication solutions, be that cloud, appliance or software based. Alleviate the risk of weak or exposed user accounts.

Encryption

Prevent unauthorised parties from accessing your data. We work with you to ensure your data is safe and securely encrypted at rest and in transit.

Disaster recovery and business continuity

Our consultants plan and test multiple risk scenarios using a range of services including Cloud Connect, Azure Site Recovery and DoubleTake.

Data leakage

Using Azure Information Protection capabilities, we help you classify and control emails, files and data.

Mail washing services

91% of cyber attacks are via email. ACS protects your business privacy from spam, phishing, spear-phishing, whaling and other malware attacks.

WE ARE WORKPLACE

TECHNOLOGY

In workplace Technology we place emphasis on flexibility and rapid decision-making, freeing employees to do more with less. We provide and implement technologies for a more connected, efficient and modern workplace, as well as investing in strategies for training or re-skilling workers to be digitally competent. Our team understands our clients' need for comprehensive visibility across a business and transforming that into real-time data. You should have the tools to make intelligent decisions about how the business uses its resources.

Managed services

Our team will assume responsibility for providing your IT procurement, installation and support either proactively or as determined by you. Our roadmap is designed to save you time, reduce your costs and protect your business from risk. Our managed services come with a no surprises approach. Priced at a fixed monthly cost, we help control your IT expenditure, efficiency and prevention of unwarranted risk. Our support team works 24/7 monitoring your infrastructure to ensure that your business gets the best use of its IT systems at all times.

Consultancy

With extensive expertise and accreditation from industry leading vendors such as Microsoft, VMware, Cisco & Dell EMC our IT consultants can help you architect an IT Strategy that is aligned to your business objectives and assists you in delivering the right outcomes for your business.

Hardware

We take the hassle out of IT procurement for you by scoping and supplying the right hardware, configuring devices before delivery and making sure everything is installed into your workplace properly.

Software licensing

Every business has the challenge of managing a variety of software and license agreements. We work with you to make the procurement, installation and management of licenses easier for you.

Cloud services

ACS are a leading cloud solutions provider with over 10 years technical knowledge in delivering agile business solutions. Access as many resources as you need, almost instantly, and only pay for what you use. Drive digital transformation and collaboration within your workplace using SaaS solutions such as VMware and Azure.

Storage and backup

Backup storage enables the maintenance, management, restoration of your workplace data for any individual, application, server or device. We scope, deploy and maintain a range of storage & backup solutions.

Disaster recovery and business continuity

Our consultants plan and test multiple risk scenarios using a range of services including Cloud Connect, Azure Site Recovery and DoubleTake.

Project management

Our PRINCE2 accredited Project Managers will ensure your IT project is deployed successfully, to timescale and to budget.

Professional installation

Professional installation is delivered by qualified engineers to help you design and deploy a broad range of IT solutions. Our team are trained to tick every box with minimum hassle.

WE ARE WORKPLACE

COMMUNICATIONS

Communications draw on our best-in class consulting, solutions, services and implementation expertise to ensure our services are able to operate efficiently in a new landscape. Our Communications products are designed and developed around your own unique business, ensuring you get the right solution needed to guarantee effective communications across your workplace. Our tailored communications solutions simplify client systems and deliver real business benefits.

BT

Internet connectivity

All of our products are delivered across dedicated business grade networks, so you are not fighting for bandwidth with peers downloading media and Skyping across the world. We have a range of the latest Ethernet products with our partners CityFibre and BTnet that can deliver up to 10GBps.

Multiple site connectivity

For businesses that operate on multiple sites at different scales, we offer solutions that connect your office networks seamlessly. These range from MPLS and SD/WAN in partnership with CityFibre and BTnet. These solutions offer a higher level of network resilience, improved Business Continuity and Disaster Recovery.

Video conferencing

Whether you have clients or workforce across town or across the globe, we will help you collaborate like everyone is in the same room. The latest technology enables you to customise the appearance to fit your brand, meet security compliance and a whole lot more.

Mobile

Discover the right network, airtime plan and smartphone solution to unify your workplace mobiles. Our team will consider your local coverage and budget with our aggregated vendors EE, O2 and Vodafone. We can supply any mobile on the market with free quarterly reviews.

Hosted voice

Hosted voice phone systems enable you to make, receive and manage calls easily and efficiently using your workplace internet connections on any device including mobiles, tablets and computers. We deliver truly unified communications through partners such as 8x8 and BT CloudVoice to enable remote working and improved employee efficiency.

Traditional phone systems

Business phone services are capable of far more than simple call handling. In some circumstances, an on-premise phone system is the right choice. We offer installation and maintenance for all the leading vendors such as Avaya and Cisco.

WE ARE WORKPLACE

INTERIORS

Our Interiors team thrive in discovering your challenges and opportunities to create a bespoke response that places how you use your space at the heart of our approach. Workplace design should evoke positive emotions and challenge the status quo to ensure continued stability and a thriving business. We cultivate true partnerships with our customers that go beyond your furniture requirements. We offer a wide range of extended services that benefit the project fulfillment and your time constraints.

Spatial design

Research shows people are happier and work harder in clear, well planned offices. Effective Spatial Design requires a specialist to establish your bespoke requirements and assess how you can maximise the potential of the space. We begin by creating strategy and concepts that transform the project into a 2D/3D visual representation. Our concepts take into consideration all the knowledge shared and cultivated in a discovery phase.

Office furniture

We partner with industry leaders to offer a wide product range for all zones and areas of the workplace, combining the highest quality and functionality with modern design and innovative technology. Our range is adaptable to varying budgets and comes with the assurance of a 5 to 15 year guarantee.

Bespoke furniture

Bespoke creations are often commissioned for many reasons. In our experience the brand personality and specific space dimensions are a leading factor in their development. In collaboration with our clients, our inhouse design team originate custom furniture needs.

Interiors

It is important to think of all the details, because even the floors, carpets, screens, solar shading, partitioning and lighting lend to the space atmosphere and identity. In addition, lighting and acoustics are significant factors for optimal working conditions. Seemingly minor details such as clothes racks, screens and office accessories play a role in the overall impression.

Project delivery

The team will drive procurement, maintain timelines and control cost expectations. It is their responsibility to bridge your relationship with qualified fitters for a stress-free delivery.

Electrical installation

Electrical installation encompasses everything from office lighting and cabling through to the mains power that drives it. We have a wide range of experience in all areas of electrical installations.

Structured cabling

The sleeping giant of any interior design project is always engineering behind the walls, floors and ceilings. We install, test and deliver data and voice cabling services, all backed with a 25 year warranty.

Visit our showroom

Visit our furniture showroom in Northampton, London or Glasgow to experience best in industry workspaces and interiors. See how the latest receptions, desk, breakout zones, collaborative spaces, meeting areas, and partitioning can be paired with top quality IT and AV products. Meet our team, learn about how we work and see the visual transformation of your workplace.
