

**WE ARE**  
**WORKPLACE**

The way we **work** is changing.  
We understand how **technology**  
& **interiors** blend, forming a fully  
connected **workplace**.

# WE ARE WORKPLACE

For over 26 years we have been proactive participants in the change and evolution of modern workplace design. The needs of our clients have facilitated the breadth of our business. We harness technology, communications and interiors to build connected workplace environments, and then place your security at the heart of our proposition.

Our commitment to grow talent and develop expertise, as well as key collaborations with trusted partners, has enabled our team to lead the way in business best practice, generating long-term value and competitive advantage for our clients.

## Cyber Security

We protect your business against ever-evolving threats to your security, both online & offline.

## Technology

We provide and implement technology for a more connected, efficient and modern workplace.

## Communications

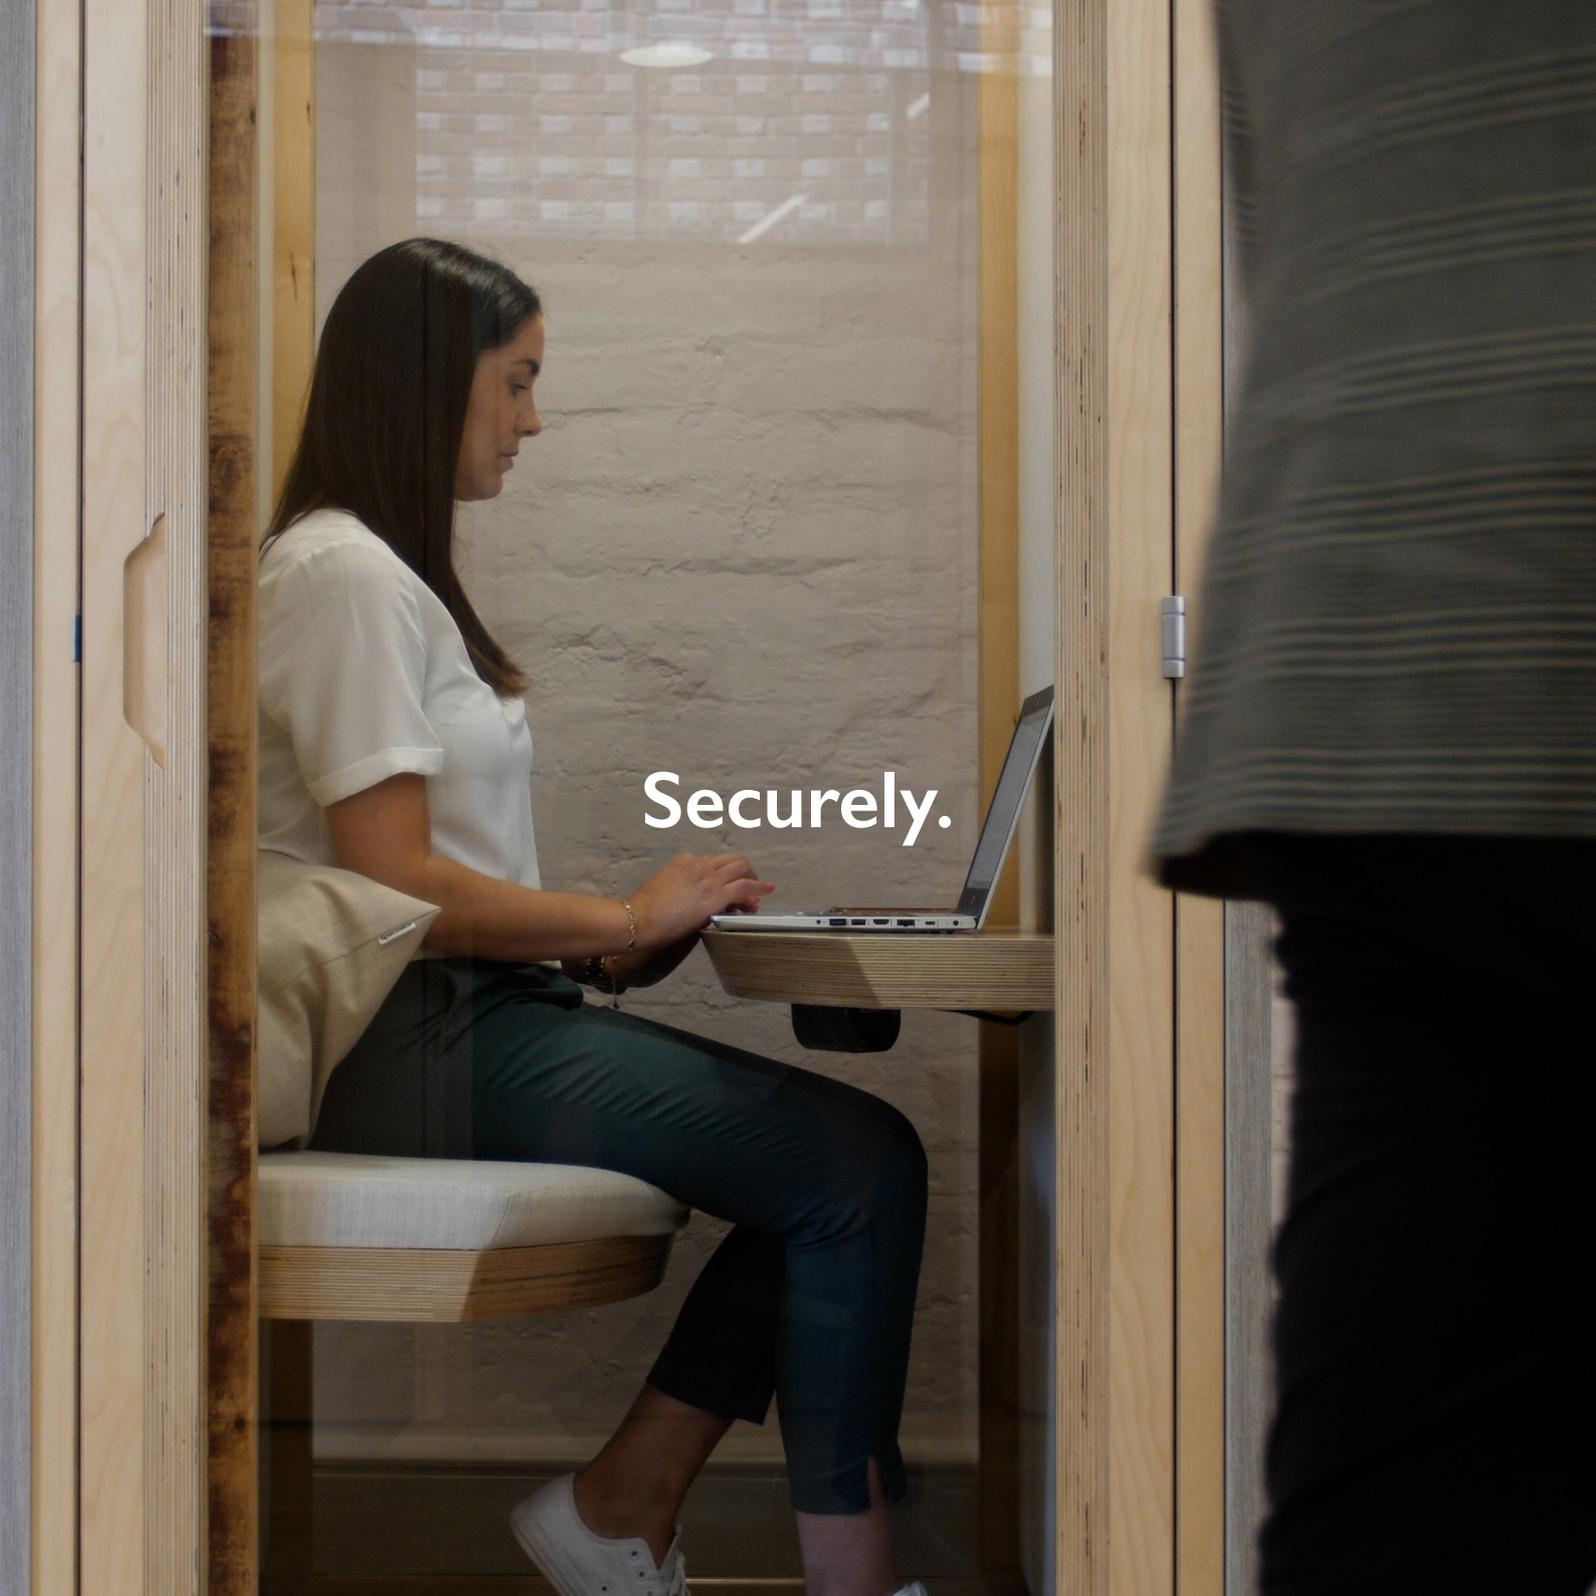

We deliver integrated communications centred around your workforce behaviour, resulting in real business benefits.

## Interiors

We create bespoke interior designs that enhance your most important asset, your workforce.

Use **technology wherever,**  
**however, whenever** you want.

A woman with long dark hair, wearing a white short-sleeved shirt and dark trousers, is sitting on a light-colored cushioned chair inside a wooden privacy pod. She is focused on a laptop computer placed on a small wooden desk in front of her. The pod is constructed from light-colored wood and has a glass door that is slightly ajar. The background behind the glass shows a textured wall and a ceiling light fixture. The overall atmosphere is professional and private.

Securely.

We protect your business against ever-evolving threats to your security, both online and offline. Constantly under threat, your cyber security should be approached in a proactive manner. Even small changes can greatly improve your cyber defences.

We offer a comprehensive portfolio of sophisticated, resilient solutions, making sure you have a robust cyber security system so that your data is protected and you can focus on growing your business.

Our experienced and accredited security team can help you protect your business against cyber criminals, regularly reviewing the threat landscape and responding to new security risks. As an IASME Licensed Certification Body, we offer auditing consultancy as well as for the Government-led Cyber Essentials certification.

Create an inspiring **workspace**

A photograph of two men in a meeting. One man, wearing a light blue short-sleeved button-down shirt, is seen from the back and side, gesturing with his hands towards a laptop on a table. The other man, wearing a black polo shirt, is leaning on the table and looking at the first man. The setting is a dimly lit room with a brick wall in the background. The text "that is as engaging as your people." is overlaid in white on the image.

that is as **engaging** as your **people**.

# Our Clients

With over 26 years experience in the industry, our exceptional client list is a reflection on our quality of service, vision and reliability.

**ACS** are synonymous with **professionalism**,  
**service** and the ability to **execute**. I have  
worked with ACS for over ten years now!  
Each time I've moved companies, one of the  
first things I do is **ring ACS**.

JOHN CVITANOVIC, GUINNESS WORLD RECORDS

# Our Process

Our processes are built upon delivery for our clients. We believe that the client experience shapes our overall engagement, and this covers all of the approaches that we may take.

## Engage

By sitting down with you and finding out from the start exactly what you're looking for, we make sure we begin with as detailed and precise a brief as possible.

## Research

Working from the initial brief we'll build on that with information gathered in the way that works for you, be that a questionnaire, audit, or survey.

## Evaluate

Once we have the information we need, we'll analyse it using our expertise and begin to identify the solutions you need.

## Propose

We have a comprehensive market knowledge and can create bespoke solutions, allowing us to clearly explain our thoughts on what will work best for your business.

## Procure

With access to more than 200 vendors and close working relationships with some of the leading names in the industry, our team will put together a plan to explain how we can meet your needs.

## Supply

From single items to a wholesale move into new technology, we can source exactly what you need, that then build in technical support services to suit your working practices.

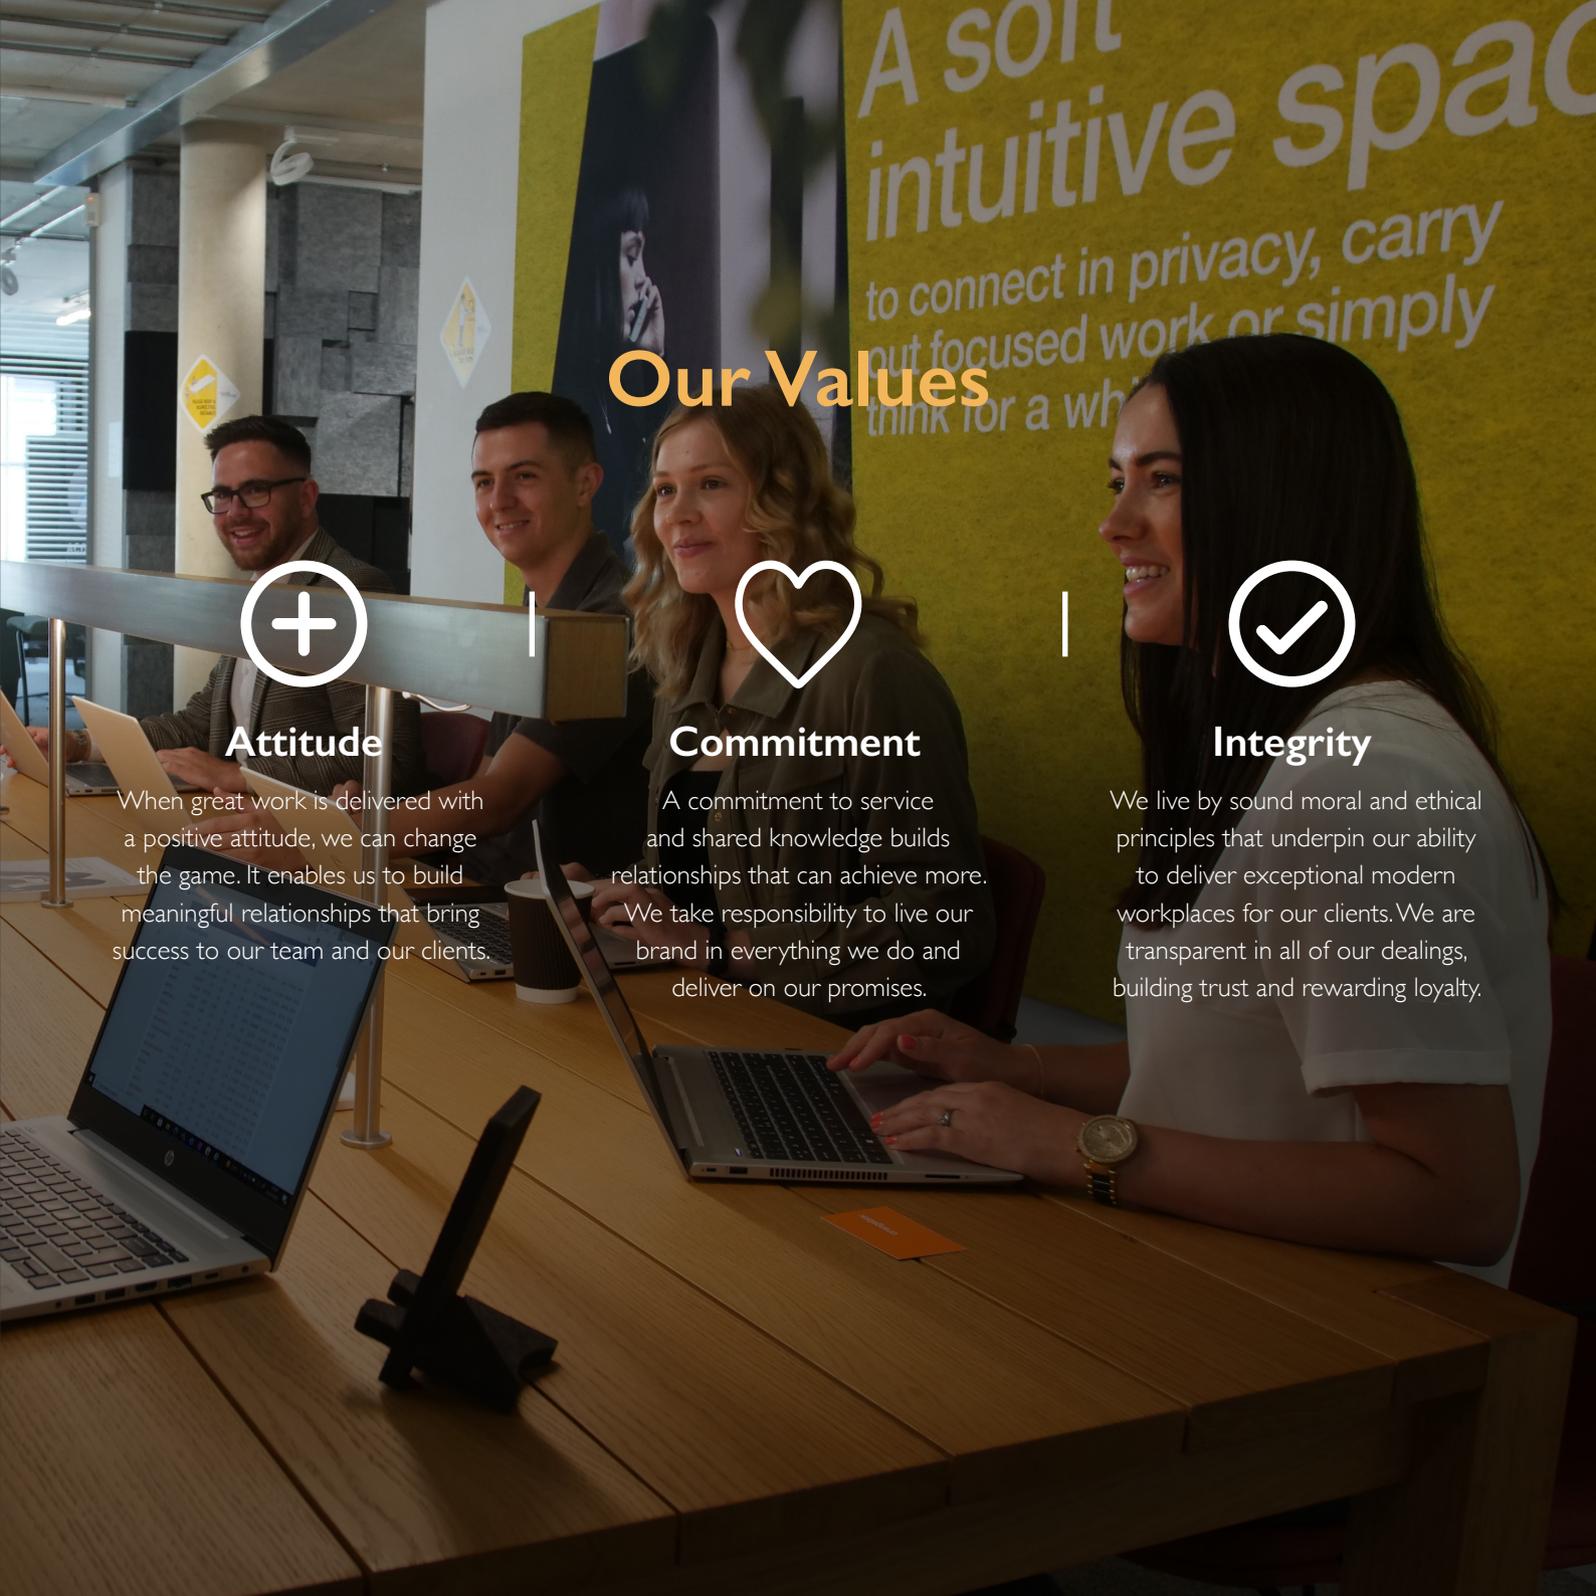

## Delivery & Installation

Experienced and knowledgeable teams in the ACS warehouse, the fitting team and our engineers will ensure that your system is delivered and installed quickly and efficiently, supporting your team as they get started on a new system.

## Day 2 Service Support

The support and maintenance teams are always on hand to answer questions or solve problems, ensuring that servicing plans, updates and warranties are in place so that the system continues to run smoothly.

## Our Values

### Attitude

When great work is delivered with a positive attitude, we can change the game. It enables us to build meaningful relationships that bring success to our team and our clients.

### Commitment

A commitment to service and shared knowledge builds relationships that can achieve more. We take responsibility to live our brand in everything we do and deliver on our promises.

### Integrity

We live by sound moral and ethical principles that underpin our ability to deliver exceptional modern workplaces for our clients. We are transparent in all of our dealings, building trust and rewarding loyalty.
